

Mobile Library Route Review

We would like to invite your feedback on our proposed updates to the Mobile Library timetable.

The current timetable has been created over the course of several years to accommodate changes to the mobile library service as they've happened and includes a lot of time spent driving between stops in different parts of North Somerset.

This proposed timetable review has allowed us to streamline the timetable and group stops in similar areas together, meaning less travelling and more time spent with customers.

We have used usage data from the past two years to determine demand across the stops, and stops have been adjusted to better meet this demand. Other stops have been moved to reach specific demographics, such as to align with school day timings.

This review of the Mobile Library timetable is separate from any review of the library service as a whole (which will be taking place over the summer), and any feedback you give will be used to inform the changes made to the Mobile Library timetable only.

The feedback survey can be accessed from Monday 5th May until Sunday 15th June using the QR code below. You can also give feedback directly to the mobile driver at your next visit.
